

Declaration of Conformity POP/ PFOA

Revision: July 2024

As a supplier of bare printed circuit boards, the KSG Group is aware of its responsibility to protect the environment and human health. Therefore, we check the conformity of our products for banned and restricted substances to the best of our knowledge and belief. Regulation 2019/1021/EU (POP Regulation) and Delegated Regulation 2020/784/EU (PFOA Regulation) serve to implement the Stockholm Convention on the restriction of persistent organic pollutants in the EU economic area.

The production, use, import and export of persistent organic substances are therefore regulated at European level. A list of substances subject to the POP Regulation can currently be found at:
<https://echa.europa.eu/de/list-of-substances-subject-to-pops-regulation>

In Germany as well as in the EU, this legislation is directly binding and the information situation in the supply chain is given accordingly.

The declaration is based on our current knowledge and experience.
No warranty or liability can be assumed for information and uses that are beyond our knowledge or that of our suppliers.

Based on the information provided by our suppliers and our own investigations, we can confirm that the substances listed in Annexes 1 - 4 of Regulation 2019/1021/EU and Delegated Regulation 2020/784/EU are not contained in the unassembled printed circuit boards manufactured by us within the specified concentration limits.
